SUBJECT INDEX

Activation energy of molecular rearrangement of silanes 1189
– –, of thermal decomposition of polyurethanes 1135
Adhesion between oxide ceramics and liquid metal 635
Adsorption – desorption, liquid-flow adsorption microcalorimeter for 313
Ageing of paper, EGA of 1153
Alfa (drug), thermal analysis of 1031
Alicyclic polyimides, thermochemical conversions of 1225
Alkali chloride-neodimium chloride systems, phase diagram of 627
– metal borates, calorimetric study of 923
Alkaline earth metal titanyl oxalates, synthesis and thermal decomposition of 771
Alloys, high temperature mixing calorimetry of 19
Alumina, chlorination reactivity of 567
Aluminium fluoride hydrates, thermal behaviour of 811
– oxide, production from basic aluminium-potassium sulfate 511
– oxides and hydroxides, thermal reactions of 765
– -zinc alloy, electrical resistance of 220
Amminecobalt (III) complexes, simultaneous TG-DTG-DTA 487
Ammonium alum, thermal decomposition of 503
– pentafluorometallate monohydrates, synthesis and thermal decomposition of 827
Anatase, thermal characterization of 803
Andersonites, thermal and i.r. studies of 389
Anti-burn-on systems, thermal analysis of 585
Antimony (III) orthoniobate – orthoantimonate system, calorimetry of 619
Apparatus for intermittent illumination in DSC equipment 1167
– for thermal analysis in reactive atmospheres 156
Application of calorimetric models 7
Arrhenius line, realiability of 173
Atmospheric pollutants, thermal desorption of, from charcoal 367
Azodicarbonamide, DSC 89

Bacampicillin hydrochloride, reaction of epimers of 1028
Barium peroxytitanate, synthesis and thermal decomposition of 727
– sulphate, reduction with carbon 603

John Wiley & Sons, Limited, Chichester
Akadémiai Kiadó, Budapest

Base line of TG curve 207
Basic aluminium-potassium sulphate, thermal dissociation of 511
Bauxites, comparative thermal analysis of 413
Benzil, purity determination with DSC 1222
Beryllium periodate hydrates, thermal decomposition of 589
Binary systems of metal chlorides 143
Biography of H.–J. Seifert 139
Bismuth phosphate, non-stoichiometric, thermal synthesis of 895
Boehmite, formation in hydrothermal treatment 767

Cadmium chloride picoline complexes, thermal decomposition of 915
Calcium carbonate-calcium fluoride mixture, thermal decomposition of 983
– – – –, phase diagram of 993
– – -silicic acid, solid-state reactions of 1003
– chloridesilicate, hydration of 817
– oxalate, formation of crystal phases of 707
– – monohydrate, DSC of 85
Calciumsulphatealuminate-gypsum system, hydration of 647
–, heat evolution during hydration 761
Calcium sulphate, effect of admixtures on decomposition of 597
Calorimeter, mixing 12
Calorimetric models 7
Calorimetry, of alkali metal borates 923
– of antimony (III) orthoniobate-orthoantimonate system 619
–, for estimation of point defect concentration 275
– of hard metals, nonlinear inverse problems of 267
–, high temperature 11
–, levitation mixing 22
–, modern developments in 1249
–, modern methods in 15
–, on swimming goldfish 1019
Carbon black, determination in polyethylene 209
Carbonate minerals in coal, DTA of 435
Carbonates, thermal dissociation at high heating rates 371
Carnallitic double salts, formation and decomposition of 113
Cation-exchange membrane, thermal stability of 1097
Cement mortars, EGA of, with additives 1147
Cemented carbides, thermal conductivity of 301
Chalcopyrite semiconductors, heat capacity of 193
Charcoal, thermal desorption from 367
Chlorination reactivity of alumina 567
Cholesteric liquid crystals, phase transformation of 1177
Chromium hydroxide, phase transformations of 857

Chathrate compounds, thermal decomposition of 225
Clay, determination of zeolite in 699
Coal, calorific value correction of 435
Complex copper oxides, stoichiometry of 883
Complexes of nickel, preparation with thermal decomposition 997
–, solid-state isomerization of 525
Concrete additives, EGA of 1147
Conformational isomerization of complexes 527
Constant rate transformation, thermal aspects of 93
Copolymers of N-vinylcarbazole-divinylbenzene, thermal stability of 1129
Correlation coefficients for an Arrhenius line 173
Crystallization kinetics, of germanium sulphide glasses 667
– –, of poly(ethylene terephthalate) 1053

Dehydration, of hydrated rare earth orthophosphates 757
– of lithium potassium tartrate monohydrate 441
– and rehydration of calcium oxalate monohydrate 716
Desorption of iodine from ion-exchange resins, TG 255
Deuterated hydrate of strontium nitrate tetrahydrate, dehydration of 447
2,5-Diaryl-2H-tetrazoles, thermal decomposition of 1201
Dicalcium orthosilicate, phase transition of 741
Diethylene glycol, effect on hydration of tricalcium silicate and – aluminate 651
Differential calorimetry, of hydration processes in calciumsulphate-aluminate-gypsum system 647
– isoperibol scanning calorimeter 361
Dilatometer, for study of distortion of multilayers 871
Differential scanning calorimetry, of Alfa (drug) 1031
– – –, apparatus with intermittent illumination 1167
– – –, of azodicarbonamide 89
– – –, of bacampicillin hydrochloride 1028
– – –, of barium peroxytitanate 729
– – –, of beryllium periodate hydrates 592
– – –, of calcium oxalate monohydrate 85
– – –, for determination of heat of adsorption 904
– – – desorption curves 251
– – –, determination of purity of semiconductors with 1222
– – –, of β-diketonates 797
– – –, of germanium sulphide glasses 667
– – –, for glass-transformation 77
– – –, heat flux, reliability of 333
– – –, of high strength polyethylene fibers 1171
– – –, of liquid crystals 1178, 1209

Differential scanning calorimetry, for low temperature 375
– – –, of methanol formation on catalysts 1235
– – –, modern developments in 1249
– – –, of phosphatidylcholines 1059
– – –, of polymerization 51
– – –, for purity determination of vitamin D_3 1034
– – –, in separation of stereo-isomeric mixtures 1241
– – –, of silane esters 1185
– – –, of solid-liquid transitions 293
– – –, of strontium nitrate hydrates and deuterates 451
– – –, for study of two-step polymerization 1159
– – – of vitamine drugs 1231
– – –, of water desorption 249
Differential thermal analysis, of alkali chloride-neodimium chloride system 625
– – –, of alkaline earth metal titanyl oxalates 773
– – –, of aluminium fluoride hydrate 813
– – –, of ammonium pentafluorometallates 830
– – –, of amorphous silicic acids 853
– – –, of anatase standard 806
– – –, of andersonites 391
– – –, of barium peroxytitanate 729
– – –, of bauxites 414
– – –, of beryllium periodate hydrates 590
– – –, of binding media of paintings 1041
– – –, of bismuth trioxide – bismuth phosphate mixture 897
– – –, of cadmium chloride picoline complexes 916
– – –, of calcium carbonate-calcium fluoride mixtures 985
– – –, – – -silicic acid mixtures 1010
– – –, –, chloride-silicate 819
– – –, of carbonate minerals in coal 435
– – –, of cation-exchange membrane 1100
– – –, of chromium hydroxide 859
– – –, of cobalt siccative 1123
– – –, for determination of zeolite in clay 700
– – –, of 2,5-diaryl-2H-tetrazoles 1202
– – –, of dicalcium orthosilicate 741
– – –, of the diopside system 427
– – –, of dyestuffs 1142
– – –, equipment for measurement of energy expended 616
– – –, of fly-ash-calcium hydroxide-calcium chloride mixture 823
– – –, of glass during ion exchange 495
– – –, for glass-transformation 77
– – –, of halogenometallates 961

Differential thermal analysis, of hydrated iron (III) oxides 459
– – – – tricalcium silicate and – aluminate 652
– – –, of hydrazinium fluorometallates 835
– – –, of hydrous zirconia 473
– – –, of 1-hydroxyethylidene-diphosphonic acid and salts 1104
– – –, of industrial wastes 423
– – –, of iron (III) oxide-zinc oxide mixture 467
– – –, of jarosite 465
– – –, of kaolinite intercalation compounds 403

Digital and symmetrical TG-DTA thermoanalyzer 325
Dihypophosphito-(urea)-copper(II), thermal decomposition of 537
β-Diketonates, thermodynamic functions of 797
Dilatometry, application in materials research 553
Diopside system, vitrification of 425
Dissolution, thermodynamics of 25
Drop calorimetry 20
Dyestuffs, thermal behaviour of 1141

Earth sciences, progress of thermal analysis in 1253
Electrical resistance, of Al-Zn alloy 219
– and thermal conductivity of hard-metals 305
Energy distribution on glass surface, DSC of 253
Enthalpy of melting, of polyethylene fibers 1173

Heat capacity of neutron irradiated glass 749
– – of niobium chlorides 213
– conduction microcalorimetry 181
– of decomposition, of polymer composite 1067
– evolution in phase transitions 107
– flux DSC cell, reliability of 333
– of immersion, cell for determination 321
– – –, determination by microcalorimeter 319
– – –, for determination of zeolite in clay 701
– production of extract from yeast 1013
– –, of swimming goldfish 1019
– of reaction, of two-step polymerization 1164
– of solution method, for measurement of heat of mixing 1079
Heats of mixing of polymer alloys 1079
Hematite, reaction with potassium carbonate 455
– reactivity, effect of low-temperature sintering on 455
High-pressure DSC equipment 1236
High-temperature calorimetry, modern methods in 15
Hydration of calcium chloride-silicate 817
– of calciumsulphate-aluminate 761
– of clinker phases 679
– of fly ash-calcium hydroxide-calcium chloride system 821
– of inorganic binders, mathematical model of 955
– of slags, microcalorimetry of 431
– of tricalcium silicate and – aluminate, effect of glycol on 651
Hydrazinium fluorometallates, thermal behaviour of 833
1-Hydroxyethylidenediphosphonic acid and salts, synthesis and thermal behaviour of 1103

Inflection points of thermal curves, special informations from 131
Infrared spectra, of andersonites 393
– –, of sabugalite 397
Iodine, desorption from ion-exchange resins 255
Ion-exchange resins, desorption of iodine from 255
Ionic temperature detectors, as temperature standards 382
Iron(III) oxides, reaction with potassium carbonate 455
– pigments, preparation by thermal methods 463
Iron-silicon powder, DTA of 564
Intercalation compounds of kaolinite, thermal decomposition of 401
Interfacial energies between oxide ceramics and liquid metals 633
Isothermal dehydration of lithium potassium tartrate monohydrate 441
– thermogravimetry, of reduction of barium sulphate with carbon 603

Jarosite, thermal decomposition of 465

Kaolinite dehydration, effect of mechanochemical activation on 531
– intercalation compounds, thermal decomposition of 401
Kinetic concepts of solid-state reactions 1267, 1269
– parameters, of clathrate compounds 228
– –, usefulness in thermal decomposition of solids 239
– studies by flow microcalorimetry 181
Kinetics, of crystallization of poly(ethylene terephthalate) 1053
– of degradation, of polyvinylchloride 187
– –, of polystyrene 1216
– of dehydration of lithium potassium tartrate monohydrate 441
– of formation and decomposition of carnallitic double salts 113
– – of whewellite and weddelite 707
– of kaolinite dehydration 531
– of molecular rearrangement of silanes 1185
–, of reduction of hematite and iron oxide containing wastes 575
– from TG and DTA 130
– of thermal decomposition of polyurethanes 1135
– – nitridation of silicon 484

Lanthanide chlorides, thermodynamic properties of 845
Lanthanum(III) β-diketonates, thermochemical properties of 977
Lanthanum oxybromide phosphors, thermoluminescence of 889
Laser-aided microfurnace, for crucible-free melting 790
Laser-melted oxide systems, glass formation of 789
Lead thiosulphate, mechanism of thermal decomposition of 543
Light-activated polymerization, study by DSC 1159
Limestone, sulphation of, study by TG 407
Liquid crystals, phase transitions of 1177
– –, thermal analysis of 1207
Liquid-flow adsorption microcalorimeter 314
Lithium indium telluride, heat capacity of 201
– potassium tartrate monohydrate, dehydration of 441
– salt hydrates single crystal dehydration 547
Low-temperature DSC equipment 375

Macromolecular "haloamines", thermal analysis of 1109
Magnesium salt-amide ligand complexes, thermal decomposition of 929
– – hydrates, TG-DTA of 912
– – -quartz mixtures, reaction of 913
– silicates, high-temperature synthesis of 909
Magnetic properties of laser-melted oxide systems 793

Mammalian cells, microcalorimetry of 43
Mass-spectrometric analysis, of multicomponent systems 1201
Mathematical aspects of non-isothermal kinetics 261
– model, of heat evolution of inorganic binders 955
Mechanochemical activation, effect on kaolinite dehydration 531
Membrane cell, for determination of heat of immersion 319
Metal chlorides, binary systems of 143
– oxides, of delafossite type, thermal behaviour of 67
Metallurgical wastes, reduction kinetics of 575
Methanol formation on catalysts, measured by DSC 1235
Methods of determination of kinetic parameters 129
Microcalorimeter, for determination of heat of immersion 319
–, liquid-flow adsorption type 313
–, for specific heat determination 361
Microcalorimetry, of heats of mixing of polymer alloys 1079
–, of heat production of extract from yeast 1013
–, of hydration of activated slag 431
–, of hydration of inorganic binders 955
–, of living cells 43
Minerals, different types of bonding of water in 121
Morphological characterization of isomerization of complexes 525
Mössbauer spectra of amorphous chromium hydroxide 861
Multilayer structure, dilatometer for study of 871

Nafion-417 membrane, thermal stability of 1097
Nematic liquid crystals, phase transformation of 1177
Nickel, mixed ligand complexes, preparation with thermal decomposition 997
Niobium chlorides, heat capacity of 213
Nitridation of silicon, thermal analysis of 479
Non-isothermal curve analysis, by electrical resistance measurement 219
– – reaction kinetics, debate on 1263
– – –, mathematical aspects of 261
– – –, strategies in 1259

Organic compounds, stability by study of flow microcalorimetry 1193
Orthoboric acid, thermal analysis of 973
Oscillatory heat production, of extract from yeast 1013
Oxide ceramics and liquid metals, interfacial energies of 633
– glasses, glass transformation temperature of 781
Oxygen solubility in superconducting system 875

Paintings, binding media of, DTA of 1041
Paper, EGA of 1153

Pharmaceutical compounds, thermodynamics of 33
Phase diagram of alkali chloride – neodimium chloride system 627
– –, DTA-TG method for determination of 991
– –, for separation of stereoisomeric mixtures 1241
– –, of silver telluride-cadmium system 612
– –, of vanadium-molybdenum-iron-oxygen system 971
– –, of Y-Ba-Cu-O superconducting system 880
– transformations of amorphous chromium hydroxide 857
– transitions of dicalcium orthosilicate 741
– –, DSC peak of 294
– –, mechanism of 107
– –, in metals 865
Phenantroline metal complexes with dicyanoargentate, thermal stability of 661
Phenolic resin, glass filled, specific heat/heat of decomposition of 1067
Phosphatidylcholines, thermotropic phase behaviour of 1059
Phospholipid – water dispersion, phase diagram of 1062
Phosphorites, thermal transformations of 839
Photopolymerization, apparatus for investigation of 1167
Point defect concentration, estimation by calorimetry 275
Polyethylene fibers, of high-strength, DSC of 1171
–, simultaneous TG-DSC of 1087
Poly(ethylene terephthalate), crystallization kinetics of 1053
Polyisoprene, thermal behaviour, effect of Co-siccatives on 1119
Polymer alloys, heats of mixing of 1079
Polymers, simultaneous TG-DSC method for investigation of 1085
Polymerization, investigation by DSC 51
– reaction, two-step, study by DSC 1159
Polystyrene with flame retardants, thermo-oxidative degradation of 1213
Polytetrafluoroethylene, DTG 87
Polyurethanes, kinetics of thermal decomposition of 1135
Polyvinylchloride, kinetic of degradation 187
Porphyrins, dissolution of 28
Potassium alum, thermal decomposition of 503
– chloride, as certified reference material 355
Purity determination of semiconductors 1221
– –, of vitamin D_3 metabolite 1033

Quantitative parameters by thermoanalytical methods 129
Quasi-equilibrium conditions, mathematical model for 93
Quasi-isothermal study, of sodium acetate trihydrate 686
Q-derivatograph, mathematical descriptions of dissociation reactions in 233

Reaction rate parameters, by heat conduction calorimetry 181

Reactive atmosphere, thermal analysis in 155
Rare earth orthophosphates, thermal behaviour of 755
Redox ractivity of transition metal oxides 519
Reference material for solution calorimetry 355
– materials for thermal analysis 347
Residual entropy of glasses 719
Rubidium chloride-magnesium chloride, phase diagram of 148
Rutile, thermal characterization of 803

Sabugalite, thermal and i.r. studies of 395
Sample mass, influence of, on thermoanalytical results 83
– state, influence on DSC peak temperature 297
Semiconductors, heat capacity of 193
–, purity determination with DSC 1221
Silanes, esters of, thermally induced rearrangement 1185
Silica glass, neutron irradiated, heat capacity of 749
Silicate glass, water desorption from 249
Silicic acids, thermal characterization of 851
Silicon, thermal analysis of nitridation of 479
Simultaneous DTA-TG and dilatometry, for sintering processes 559
– TG-DSC method, for polymers 1085
– TG-DTG-DTA, of ammonium alum 503
– –, of andersonite 391
– –, of basic aluminium-potassium sulphate 512
– –, of bauxites 414
– –, of kaolinite intercalation compounds 401
– –, of potassium alum 503
Single crystal dehydration of lithium salt hydrates 547
Sintering processes, optimization by thermal analysis 559
Silver carboxylates, thermal decomposition of 735
– telluride-cadmium system, phase equilibria in 609
Slag, activated, microcalorimetric study of 431
– binders, hydration of, microcalorimetry of 431
Sodium acetate trihydrate, as thermal energy storage material 685
– chloride, effect of, on sulphation of limestone 410
– formate-sodium hydroxide system, TG of 210
Solid-gas phase reactions, DSC of 293
Solid-state isomerization of complexes 525
– –, morphological characteristics of 526
– – reactions of calcium carbonate-silicic acid mixture 1003
– – –, influence of structural parameters on 63
– – –, kinetic concepts of 1267, 1269
– –, stochastic models of 281

Solids, estimation of point defect concentration in, by calorimetry 275
Solution calorimetry, reference material for 355
– –, for thermochemical properties of lanthanum (III) β-diketonates 977
Specific heat, of polymer composite 1067
– –, of metallic foils 673
Stochastic models of solid-state reactions 281
Strontium nitrate tetrahydrate, dehydration of 447
– oxide, preparation from strontium nitrate hydrate 453
Styrene phosphonic acid, adsorption, microcalorimetry of 317
Sulphation of limestone, study by TG 407
Sulphides of molybdenum and tungsten, preparation of 66
Superconducting system, oxygen solubility in 875
Superconductor processing, DTA of 947
Synthesis of vinylidenediphosphonic acid, by thermal analysis 1091
Synthetic fatty acid cobaltates, accelerating effect on vulcanization 1119

Temperature-programmed ammonia desorption from zeolites 693, 933
– – limited thermal decomposition 519
Ternary chlorides, stability criteria for 144
TG-DTA thermoanalyzer, digital and symmetrical 325
Theoretical thermal curves, as functions of kinetic parameters 240
Theory of calorimetric models 7
Thermal analysis of anti-burn-on systems 585
– –, of cadmium chloride picoline complexes 915
– –, of commercial bauxites 413
– –, data for drugs, interpretation of 1027
– –, of differently bonded water in minerals 121
– –, of industrial wastes 421
– –, progress in earth sciences of 1253
– – in reactive atmospheres 155
– –, for synthesis of vinylidenediphosphonic acid 1091
– –, of zeolite precursors 941
– conductivity, of cemented carbides 301
– decomposition, of alicyclic polymides 1225
– –, of aluminium fluoride hydrates 811
– –, of amminecobalt (III) complexes 487
– –, of ammonium pentafluorometallate monohydrates 827
– –, of andersonites 389
– –, of barium peroxytitanate 727
– –, of calcium carbonate-calcium fluoride mixture 983
– –, of calcium sulphate containing admixtures 597
– –, of carnallitic double salts 113
– –, of clathrate compounds 225

Thermal decomposition, of 2,5-diaryl-2H-tetrazoles 1201
– –, of dihypophosphito-(urea)-copper (II) 537
– –, of halogenometallates 961
– –, of hydrazinium fluorometallates 833
– –, of 1-hydroxyethylidenediphosphonic acid and salts 1103
– –, of kaolinite intercalation compounds 401
– –, of lead thiosulphate 543
– –, of magnesium salt-amide ligand complexes 929
– –, of orthoboric acid 973
– –, of phenantroline metal complexes with dicyanoargentate 661
– – for preparation of nickel mixed ligand complexes 997
– –, of sabugalite 395
– –, of silver dicarboxylates 735
– – of solids, theoretical curves of 240
– dehydrochlorination of PVC 187
– desorption of pollutants on charcoal 367
– dissociation of carbonates at high heating rate 371
– – reactions, mathematical description of 233
– energy storage material, thermal behaviour of 685
– expansion in materials research 553
– methods for characterization of pharmaceuticals 36
– preparation of iron (III) pigments 463
– synthesis, of non-stoichiometric bismuth phosphate 895
Thermally induced rearrangement of silane esters 1185
Thermochemical properties of lanthanum (III) β-diketonates 977
Thermodynamics of dissolution 25
Thermogravimetry, of Alfa(drug) 1031
–, of alkaline earth metal titanyl oxalates 773
–, of aluminium fluoride hydrate 813
–, of amorphous silicic acids 853
–, of andersonites 391
–, of anti-burn-on systems 586
–, of bacampicillin hydrochloride 1028
–, of barium peroxytitanate 729
–, of bauxites 414
–, of beryllium periodate hydrates 590
– curve, base line of 207
–, of cadmium chloride picoline complexes 916
–, of calcium carbonate-calcium fluoride mixtures 985
–, of calcium oxalate hydrates 713
–, of cation-exchange membrane 1100
–, of chlorination reactivity of alumina 567
–, of clathrate compounds 225

Thermogravimetry, of cobalt siccative 1123
–, of desorption of iodine from ion-exchange resins 255
–, of 2,5-diaryl-2H-tetrazoles 1202
–, of dyestuffs 1142
–, of halogenometallates 961
–, of hydrated iron (III) oxides 459
– – rare earth orthophosphates 756
–, of hydrazinium fluorometallates 835
–, of hydrous zirconia 473
–, of 1-hydroxyethylidenediphosphonic acid and salts 1104
–, of industrial wastes 423
–, of jarosite 465
–, of kaolinite intercalation compounds 404
–, of macromolecular N-halogenosulphonamides 1109
–, of orthoboric acid 974
–, of paper 1154
–, of phenolic resin, glass filled 1073
–, of phosphorites 840
–, of cis-1,4-polyisoprene 1124
–, of polystyren 1215
–, of polyurethanes 1136
–, of reduction kinetics of wastes 575
–, of sabugalite 396
–, of strontium nitrate hydrate and deuterate 448
–, of transition metal oxide complexes 885
–, of Versatic 10 1122
–, of N-vinylcarbazol-divinylbenezene copolymers 1130
–, of Y-Ba-Cu-0 superconducting system 877
Thermoluminescence, of terbium(III) doped LaOBr phosphors 889
Thermomagnetometry, for transitions in metals 865
Thermometric standard in thermal analysis 381
Thermooptical analysis, of liquid crystals 1177
Thermo-oxidative degradation of polystyrene with flame retardants 1213
Thermotropic phase behaviour, of phosphatidylcholines 1059
Transition metal oxides, determination of oxygen in 883
– – –, redox reactivity of 519
Tungsten carbide-cobalt system, shrinkage and mass loss of 562

Vanadia, thermal preparation of 65
Vanadium-molybdenum-iron-oxygen system, phase diagram of 971
Versatic 10, accelerating effect on vulcanization 1119
Vitamin D_3 metabolite, determination of purity of 1033

Vitamin drugs, quality analysis of, by DSC 1231
Vitrification in the diopside system 425
N-Vinylcarbazole-divinylbenzene copolymers, thermal properties of 1129
Vinylidenediphosphonic acid, synthesis by thermal analysis 1091

Wastes, hematite and iron oxide containing, reduction of 575
–, of steel works, thermal analysis of 421
Water desorption, DSC curves of 249
–, different types of bonding in minerals 121
–, effect on sulphation of limestone 409
– -salt glasses, glass transformation of 801
Weddelite, kinetics of formation of 707
Whewellite, kinetics of formation of 707

Yeast, extract from, oscillatory heat production of 1013
Yttrium-barium-copper salt coprecipitates, stoichiometry of 947

Zeolite catalysts, determination of heats of adsorption of 903
–, determination in clays via thermal effects 699
Zeolites, methods for characterization of 689
Zeolite precursor, thermal analysis of 941
Zeolites, temperature-programmed desorption of ammonia from 833
Zirconia, hydrous, thermal analysis of 471
Zirconium dioxide production, optimization by thermal analysis 471
